4	Answer questions 1 and	d 2	

- 2. Write your answers on the spaces provided on the question paper.

Cell phones are not allowed in the examination room.

Page 2 of 4

Question 1: Cloze Passage (10 Marks)

In the following passage, some of the words have been left out. In each space write the ONE WORD which you think is the most suitable. The first one has been done for you as an example.

POACHING

protected areas worldwide. High meat yielding large are the principal targets of poachers. Ike guinea fowls and animals like elephants and rhinos are (4) for the high trade value they attract on the international markets. In Zambia, we all realise that hunting has been traditionally done the ages, perhaps because it was in an age when the forest was vast, the human population low and wildlife in extremely numbers. Many local villagers and other people living in areas reserved for wildlife use their traditional skills and knowledge of the forests to hunt and set to kill the threatened animals. What do not realise is that poaching has a impact on the wildlife species. It is ruinous. Several animals have been stumped (10) of existance. Poaching has led to the extinction of some wildlife (11) of existance. Poaching has led to the extinction of some wildlife (11) of prey (13) immediately eliminate large carnivores like the ions. Zambia Wildlife Authority (ZAWA) has put in place a mechanism for strict implementation of the law by strategically locating anti-poaching camps serve as a barrier to poaching and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in the strict wild the strategically locating and smuggling found in	Poaching is a problem (Example) not only in Zambia but in
are the principal targets of poachers. In Zambia, we all realise that hunting has been traditionally done the ages, perhaps because it was in an age when the orest was vast, the human population low and wildlife in extremely numbers. Many local villagers and other people living in areas reserved for wildlife use their traditional skills and knowledge of the forests to hunt and set to kill the threatened animals. What do not realise is that poaching has a impact on the wildlife species. It is ruinous. Several animals have been stumped (10) of existance. Poaching has led to the extinction of some wildlife (11) oushing several others to critical levels. The reduction of prey is one of the serious threats to predators. Therefore, the elimination of prey (13) immediately eliminate large carnivores like the implementation of the law by strategically locating anti-poaching camps serve as a barrier to poaching and smuggling found in	1) protected areas worldwide. High meat yielding large
