

GENERAL CERTIFICATE OF EDUCATION BOARD

General Certificate of Education Examination

Geography 3
0750

JUNE 2022

ADVANCED LEVEL

Subject Title	Geography
Paper No.	Paper 3
Subject Code No.	0750

THREE AND A QUARTER HOURS

Answer **FOUR QUESTIONS** in all.

Answer question **ONE** and three others, choosing at least **ONE** question from **SECTION B** and **TWO** from **SECTION C**.

Question **ONE** carries **thirty-one** marks and the rest carry **twenty-three** marks each.

Only the required number of questions will be marked.

In answering questions on this paper, you are encouraged to refer to your own field and practical work where relevant. Credit will be awarded for such references.

Candidates are advised **NOT** to attempt the questions on field investigations if such an exercise has not been carried out.

Marks will be awarded for well annotated maps and diagrams where these are relevant.

You are reminded of the necessity for good English and orderly presentation in your answers.

Calculators are allowed.

Materials required: Topographic map, graph paper and two outline maps of Cameroon.

SECTION A
MAP WORK

1. Study the map extract of BAKAKA and its Environs at 1:50.000 provided and answer the questions that follow.
- a) Briefly describe the **drainage** characteristics of the map area. (6 marks)
- b) i) Using map evidence only, briefly state the difficulties posed by relief in the development of the area. (6 marks)
- ii) Propose strategies that can be adopted to overcome the problems identified in b) i) above. (4 marks)
- c) Using evidence from the map, identify and state **TWO** reasons why the northern part of the map is ideal for the location of a hospital. (4 marks)
- d) You have been consulted to determine the level of transport network development in the area:
- i) Draw a *topological diagram* of the road network. Use the following settlements as nodes: Quartier 8, Manjo Etam, Manengole I, Manengole II, Manengole 3, Nkong Niny 1, Nkong Niny 2, Ebone 1, Ebone 2, Ekang Loe and Ekomto. (6 marks)
- ii) Using the beta index, determine the level of transport network development in the area. (2 marks)
- iii) Propose measures that can be adopted to improve the transport network of the area. (3 marks)
- (31 marks)**

SECTION B:

FIELD WORK AND TECHNIQUES

2. Based on fieldwork you have undertaken in Physical or Human Geography, choose one of the following topics:
- i) Variation in any ONE soil characteristic;
- ii) Differences in any weather element;
- iii) Changes in any ONE vegetation characteristic;
- iv) Differences in rural or urban land uses or characteristic;
- v) Location of a modern farm or agricultural system;
- vi) Changes or the relative importance of any ONE industrial or factory characteristic.
- a) With the aid of a sketch map, describe the area where the fieldwork was carried out. (5 marks)
- b) (i) What was the purpose of the investigations? (5 marks)
- (ii) State the type of data that was required. (6 marks)
- c) How was the data collected, processed, and presented? (2 marks)
- d) What was the conclusion arrived at after processing the data? (3 marks)
- e) What possibly accounts for the results obtained? (2 marks)
- f) State the significance of the fieldwork.

3. The table below shows the population of ten villages (labelled here with letters of the alphabet A-J) in a certain Sub Division

Population of ten villages in a Sub Division

Village	Population
A	10,000
B	20,750
C	2,275
D	18,000
E	5,500
F	29,250
G	8,750
H	3,500
I	16,800
J	28,200

- a) Calculate the interquartile range and state its significance. The formula for calculating the interquartile range is stated as:

$$IQR = Q3 - Q1$$
 Where IQR is the interquartile range, Q3 is the upper quartile and Q1 is the lower quartile (5 marks)
- b) Using the outline map of the area attached below, represent the data by means of choropleth map. Use a scale of 1:2000 and divide the population into 5 classes or groups. (8 marks)
- c) Describe any TWO problems associated with each of the following areas:
 i) areas of high population concentration
 ii) areas of low population concentration. (6 marks)
- d) What TWO measures can be adopted to solve the problems associated with each of the areas cited in c i) and ii) above? (4 marks)

SECTION C:

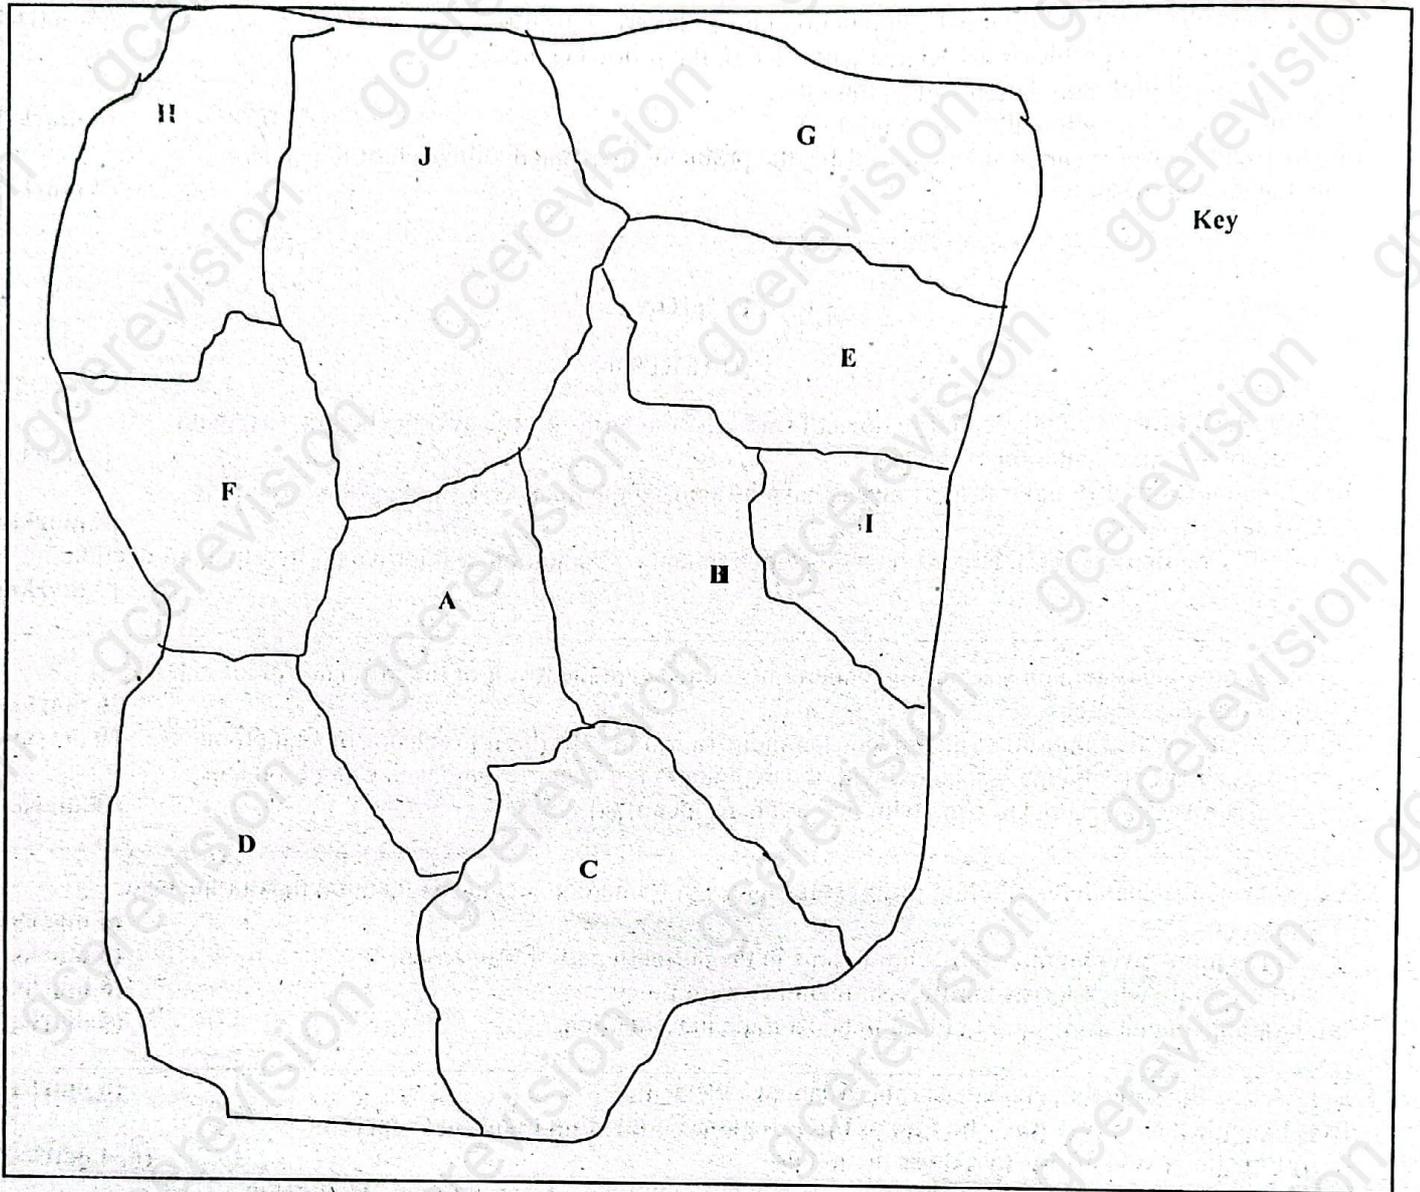

CAMEROON

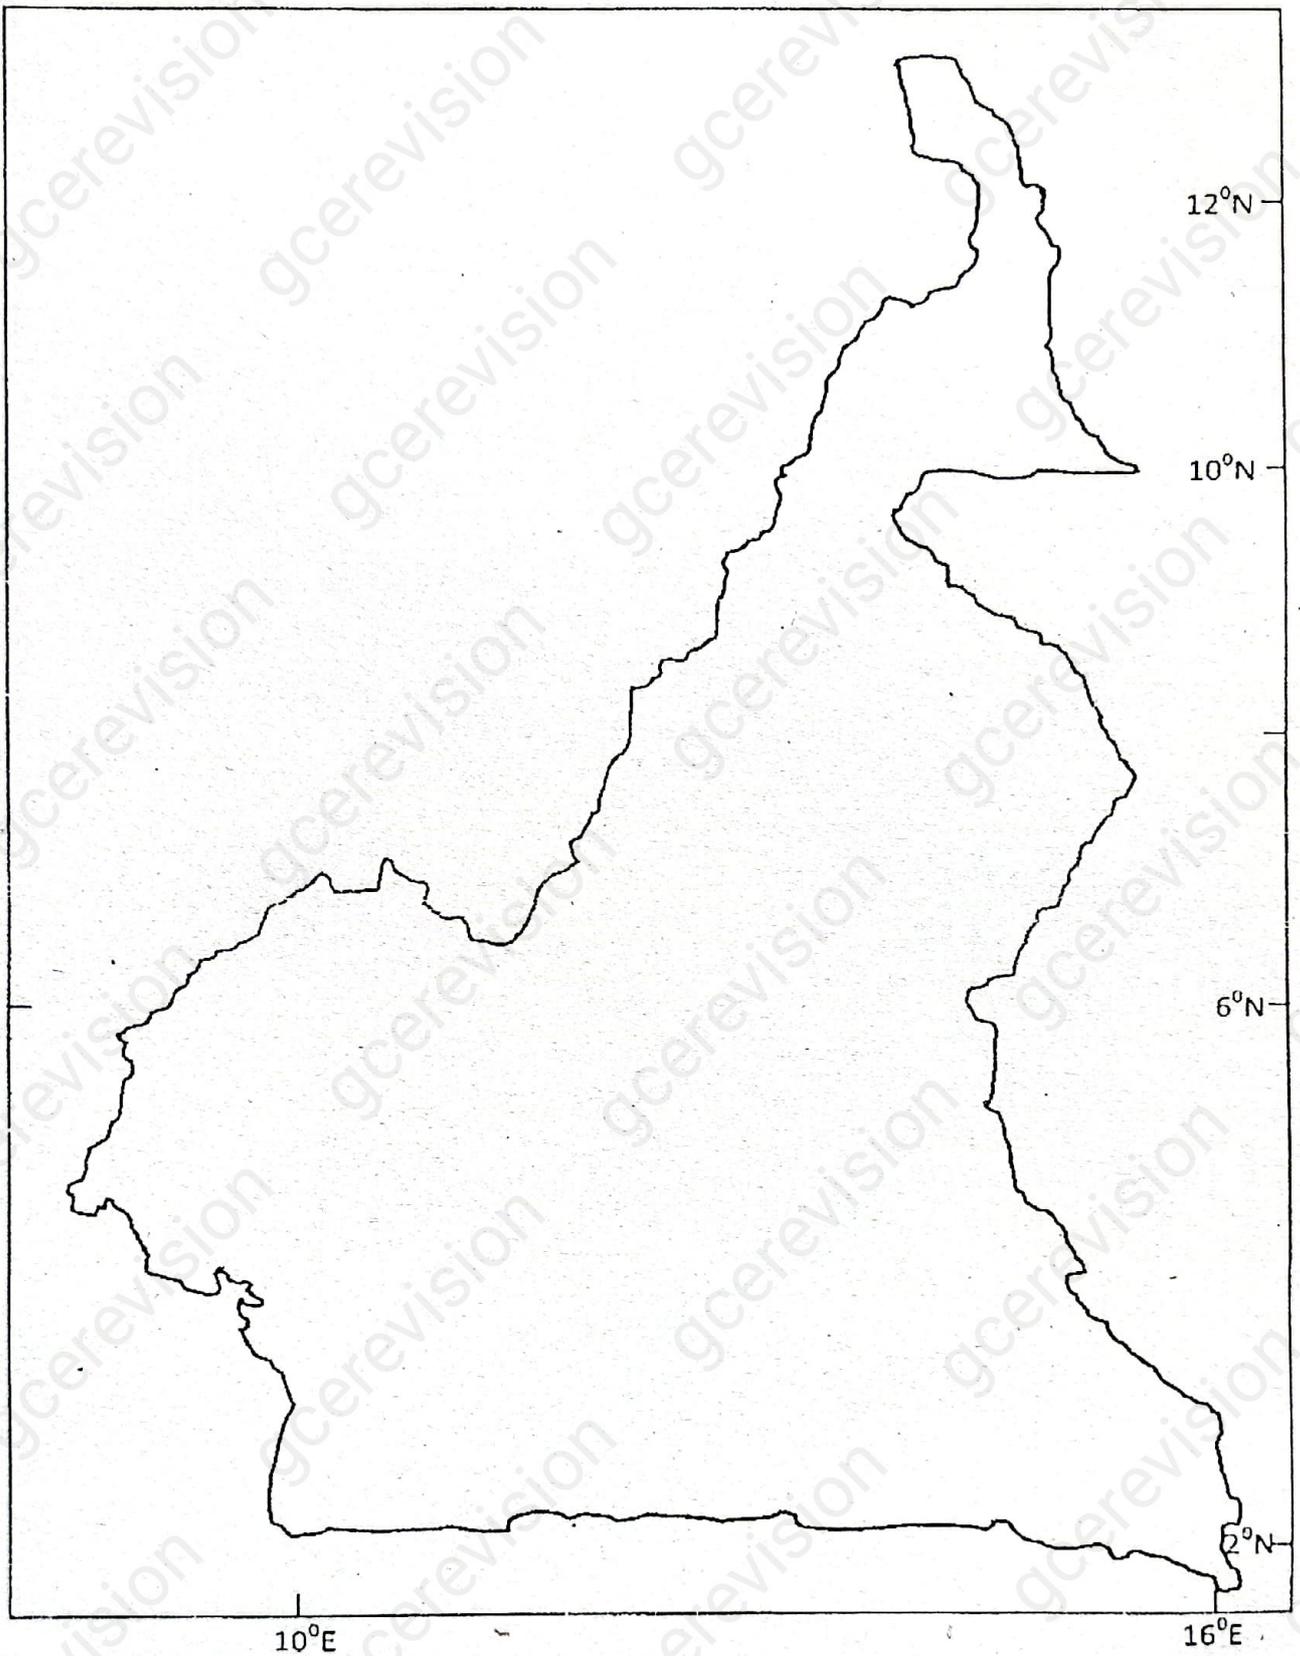

4. a) Describe any TWO major relief regions of Cameroon in terms of: the average height, two main landforms and orientation of the land. (8 marks)
- b) Explain how market and transport means have influenced the main system of agriculture in the Coastal Lowlands. (8 marks)
- c) Briefly examine any THREE efforts by the government of Cameroon to improve on livestock production. (7 marks)
-
5. a) Show how the two main seasons of Cameroon's climate are the result of the influence of air masses from different sources. (6 marks)
- b) Examine the distribution of manufacturing industries in the Northern Lowlands of Cameroon. (8 marks)
- c) Discuss TWO problems associated with the exploitation of water resources in Cameroon and suggest TWO measures to cope with the problems identified. (9 marks)
-
6. a) Describe the spatial distribution of forest resources in Cameroon and locate them on the outline map provided. (6 marks)
- b) i) Examine TWO major tourist attractions in the northern part of Cameroon. (6 marks)
 ii) Explain why tourists hardly visit them in recent times. (6 marks)
- c) Examine the measures put in place to boost trade in Cameroon. (5 marks)
-
7. a) Describe the soil characteristics of the Adamawa Plateau. (6 marks)
- b) i) Examine any TWO push factors of inter-regional migration trends in Cameroon
 ii) Explain TWO efforts to redress the trends. (6, 4 marks)
- c) Explain any THREE measures by the government to improve on transport development in Cameroon. (7 marks)
